I oppose the Dept. of Energy plans to create devastating new H-bombs at its labs in CA and NM, and then build them at a new, revitalized nuclear weapons complex at multiple locations across the U.S.

This is madness. It will increase proliferation. It will pollute our communities. It will cost hundreds of billions of dollars that could be spent on life-sustaining enterprises.

Reject the Complex 2030 plan. Stop the new H-bomb, the so-called "Reliable Replacement Warhead." Instead, fully comply with the Non-Proliferation Treaty and help move the world toward the elimination of nuclear weapons.

Sincerely,
