

**1<sup>st</sup> YEAR  
RADIOACTIVE REPORT CARD  
2009-2010**

Issued to:

**PRESIDENT BARACK OBAMA**

by the Alliance for Nuclear Accountability

[www.ananuclear.org](http://www.ananuclear.org)

<b>Subject</b>	<b>Grade</b>	<b>Comment</b>	<b>The Administration Should</b>
<b>Reducing the Nuclear Threat</b>	<b>B</b>	Hosting UN Security Council session and renewed US commitment to strengthening nonproliferation	<i>Secure ratification for New START and CTBT Treaties. Use upcoming Security Summit to secure loose nuclear materials and support treaty halting production of nuclear weapons materials.</i>
<b>Nuclear Weapons Infrastructure</b>	<b>D</b>	Providing largest ever funding increases for expanding nuclear weapons production capacity will not secure treaty ratification	<i>Increase warhead dismantlement rates, avoid unnecessary changes to stockpile and match Life Extension Programs to reduced stockpile numbers.</i>
<b>Cleanup of Contaminated DOE Weapons Complex Sites</b>	<b>B</b>	Extra money for cleanup in stimulus temporarily doubles funding for cleanup but no long-term commitment	<i>Provide adequate funding to meet all environmental and legal obligations. Increase transparency in budgets and milestones.</i>
<b>Stopping Yucca Mtn. Nuclear Dump</b>	<b>A</b>	A promise kept	<i>End remaining Yucca funding and block "interim" high-level waste storage schemes to create new radioactive dumps.</i>
<b>Overhaul Radioactive Waste Management</b>	<b>Incomplete</b>	Work not yet begun but appointed commission is dominated by nuclear industry advocates	<i>Add public interest representatives to Blue Ribbon Commission, and open up the process. Implement Hardened On Site Storage</i>
<b>Risky Nuclear Power Revival</b>	<b>F</b>	Recommending huge federal government subsidies to construct new reactors and enrichment plants, and produce plutonium fuel	<i>Stop taxpayer-funded Nuclear Bailout. Stop plans for using plutonium fuel in commercial reactors.</i>
